This particular volume is a well-written, colorful, well-illustrated guide to engines and rolling stock (train cars of various types) made by Lionel from 1945 to 1969 (postwar). These volumes provide details which would be of interest to any collector and of serious importance to potential buyers of any of the higher-priced items whose value may fluctuate based on particular details of different items which may generally appear to be the same. All of the Kalmbach / Greenberg's volumes are full of useful data and pictures. Start
